

Wednesday Challenge Form

Group Members: Jaden's Team

Problem Statement: The class is divided into half, each team and the members needs to use sticks and as a team, move the marble into the bag without overlapping the stick. Everyone in the team must touch the stick.

Approach:

Solution: Our team was the winning team, accomplished putting the marble into the bag faster than the other team members. We tried to not drop the marble by moving the marble slowly towards the end.

Lessons Learned: If I would do this challenge again, I would do the same way as our team did. The key to this challenge was teamwork and not blaming others for making the mistake.
